QUALIFICATION	**Data Analytics (CS-ICTDAT323)**
☐ BASIC ☐ COMMON ☒ CORE COMPETENCIES	
UNIT OF COMPETENCY NO. **CS-ICT251205**	**APPLY BASIC STATISTICAL CONCEPTS AND ANALYSIS**

Self-Check 1.1-1: Introduction to Data and Statistics Concepts

Self-check · Module version 2 · Completed · Handed in 1 time

Self-check, attempt 1: 10 of 10 correct

1. What is the main advantage of data as evidence over anecdotal evidence?
   Answer: Data uses a large sample collected systematically — Correct
2. In a data matrix, what does one row represent?
   Answer: One observation or case — Correct
3. Which type of study can establish causation?
   Answer: Experiment with random assignment — Correct
4. What was the main problem with the 1936 Literary Digest poll?
   Answer: The sample was biased toward wealthier voters — Correct
5. In stratified sampling, what do you do after dividing the population into strata?
   Answer: Randomly sample within each stratum — Correct
6. What is a placebo?
   Answer: A fake treatment used as the control in medical studies — Correct
7. Which variable type can take any value in a range and is usually measured?
   Answer: Continuous numerical — Correct
8. What does random assignment in experiments accomplish?
   Answer: It balances other variables evenly across treatment groups — Correct
9. In the Google Transparency Report example, what does each row in the data matrix represent?
   Answer: One country — Correct
10. What does voluntary response bias involve?
    Answer: No random sample; only those with strong opinions opt in — Correct

This sheet is a record of the work done on one activity. It is not a competency decision: competence in a unit is decided on assessed evidence.
