UNIT OF COMPETENCY NO. **CS-ICT251205**	**APPLY BASIC STATISTICAL CONCEPTS AND ANALYSIS**

Self-Check 1.1-5: Identifying Statistical Terms and Concepts

Self-check · Module version 2 · Completed · Handed in 1 time

Self-check, attempt 1: 10 of 10 correct

1. What is the term for the grid structure organizing data into rows of cases and columns of attributes?
   Answer: Data matrix — Correct
2. What type of study observes without interfering and can only establish association?
   Answer: Observational study — Correct
3. What sampling bias occurs when only those with strong opinions opt in to participate?
   Answer: Voluntary response bias — Correct
4. What is the process of randomly assigning subjects to treatments to balance out other variables?
   Answer: Randomization — Correct
5. What do you call improvement that occurs simply because subjects believe they got a special treatment?
   Answer: Placebo effect — Correct
6. What type of variable has levels with a natural, inherent order?
   Answer: Ordinal — Correct
7. What sampling method divides the population into varied clusters, picks a few randomly, then samples everyone inside?
   Answer: Cluster sampling — Correct
8. What principle of experimental design involves comparing the treatment against a control group?
   Answer: Control — Correct
9. What is a survey of every individual in the entire population called?
   Answer: Census — Correct
10. What is the variable in an experiment that researchers impose as a condition being tested?
    Answer: Explanatory variable — Correct

This sheet is a record of the work done on one activity. It is not a competency decision: competence in a unit is decided on assessed evidence.
